Objective

Front-End Web Developer and Graphic Designer with over a year of professional experience and 3+ years of self-learning. I am passionate about building responsive, accessible web interfaces using ReactJS. Seeking to contribute front-end expertise and design sensibility to a collaborative team in Canada, while continuing to grow in a real-world development environment.

Professional Experience

Front-end Web developer | *Salyani Technologies – Chitwan, Nepal* (Feb.2022 – Apr.2023)

- Collaborated with a team to create responsive websites, portfolio, blog sites with HTML5, CSS3, JavaScript and WordPress.
- Translated Figma and Adobe XD designs into responsive web interfaces.
- Communicated with clients to understand and implement their technical and design requirements.
- Performed debugging, maintenance, and updates on existing sites.
- Used GitHub and GitLab for version control and code collaboration.
- Actively self-learned new technologies during project downtime to expand skills.

Self-learning & Personal projects

Front-End Developer (Freelance & Personal Projects) *Canada | (May 2023 – Present)*
After relocating to Canada, I focused heavily on ReactJS and have worked on the following deployed projects:

- **Expense Tracker App** – expentrackapp.netlify.app

  - Developed a full-stack expense tracking application using ReactJS, Node.js, Express, and MongoDB.
  - Implemented functionality to add and view expenses, with upcoming features including edit/delete options and user authentication.
  - Focused on CRUD operations, API integration, and frontend–backend communication to strengthen MERN stack proficiency.
  - Deployed the frontend via Netlify for seamless access and performance.

- **Calculator app** – Calculatemate.com
  - Developed a responsive calculator application using ReactJS, focusing on component-based architecture and state management.
  - Implemented essential arithmetic operations with a clean, minimal UI for an intuitive user experience.
  - Emphasized reusability, responsiveness, and efficient rendering using React hooks.
  - Deployed the app on Netlify for easy access and performance optimization.

- **Portfolio website** – Abishekpariyar.com (My portfolio website)

- Developed a responsive website for a local HVAC business. Integrated SwiperJS for image sliders and Framer Motion for animations. Emphasized intuitive navigation, clean layout, and performance optimization. Fully customized to match brand identity and deployed via Netlify.

- **2Bros HVAC website** – 2Broshvac.ca (Client website)

  - Developed a responsive website for a local HVAC business. Integrated SwiperJS for image sliders and Framer Motion for animations. Emphasized intuitive navigation, clean layout, and performance optimization. Fully customized to match brand identity and deployed via Netlify.

Skills

Technical skills

- HTML5, CSS3, ReactJs, Javascript, JSX
- Version Control, Debugging, Error handling
- Responsive design
- Deployment and hosting

Design skills

- Adobe photoshop, Adobe Illustration, Adobe InDesign, Figma.
- Color theory, Typography, Grids

General skills

- Attention to detail, Communication, Creativity.
- Printing knowledge.

Education

- **Advertising and Graphics designing** – Humber college, Etobicoke, Canada (2024 – running)
- **Diploma in Computer Engineering** – Nepal Polytechnic Institute, Chitwan, Nepal (2019 - 2021)
